PROFESSIONAL SUMMARY

Detail-oriented and adaptable Computer Science graduate with hands-on experience in front-end web design, digital content development, project execution, and quality checking. Strong ability to understand instructions and requirements, review visual layouts for accuracy and consistency, identify issues, apply revisions, and maintain quality standards. Experienced in working with HTML, CSS, JavaScript, and digital design workflows. Strong problem-solving, communication, time-management, and attention-to-detail skills with a willingness to learn Adobe Illustrator, production artwork, print production, and apparel production processes.

CORE COMPETENCIES

Production Artwork Review • Artwork Quality Checking • Design Review & Revision
• Attention to Detail • Instruction Comprehension • Quality Assurance (QA) • Error Identification & Resolution • Layout & Visual Consistency • Design Placement & Sizing • Digital Artwork • Vector Graphics Fundamentals • Print Production Fundamentals • Problem Solving & Critical Thinking • Written & Verbal Communication • Requirement Analysis • Time Management • Fast-Paced Work Environment • Remote Work & Self-Management • Continuous Learning • AI-Assisted Productivity Tools

TECHNICAL SKILLS

Design & Artwork: Adobe Illustrator – Developing Proficiency, Adobe Photoshop – Familiarity, Digital Design, Vector Graphics, Layout, Typography, Artwork Review

Web Technologies: HTML5, CSS3, JavaScript

Programming: Python

Database: SQL

Development Practices: SDLC, OOP, Quality Checking, Debugging

Tools & Workflow: AI-Assisted Productivity Tools, Digital Content Tools

EXPERIENCE

PYTHON FULL STACK DEVELOPMENT INTERN

BrainOvision Company | 18/07/2022 – 06/08/2022

- Worked on front-end and back-end development of a movie ticket-booking application using HTML, CSS, JavaScript, Django, and SQL.
- Reviewed web layouts, content, and interface elements to identify errors and maintain visual consistency.
- Implemented revisions based on project requirements and instructions.
- Identified and resolved interface and functionality issues during development and testing.
- Paid close attention to layout, content accuracy, spacing, alignment, and presentation.
- Collaborated on project tasks while maintaining quality and meeting development requirements.
- Applied problem-solving and critical-thinking skills to troubleshoot issues and improve the final product.

FRONT-END WEB DESIGN WORKSHOP

Airbaclabs Company | 25/05/2022 – 28/05/2022

- Worked on front-end web design and development for an e-commerce website.
- Created and revised digital layouts using HTML and CSS.
- Reviewed design elements for consistency, structure, alignment, and visual presentation.
- Applied project instructions and feedback to make required design revisions.
- Developed an understanding of digital design workflows and quality-focused review.

EDUCATION

B.Tech – Computer Science and Engineering | G. Pullaiah College of Engineering and Technology | CGPA: 8.46

Intermediate | Sri Chaitanya Junior College | 2020

Class X | Sri Santhinikethan High School | 2018 | CGPA: 9.8

PROJECTS

MOVIE TICKET BOOKING APPLICATION

HTML | CSS | JavaScript | Django | SQL

- Developed a full-stack movie ticket-booking application with a focus on clear and consistent user-interface design.
- Created and revised digital interface elements according to project requirements.
- Reviewed layouts and content to identify inconsistencies and usability issues.
- Tested the application and resolved identified issues before completion.
- Maintained consistency in page structure, content presentation, spacing, and visual elements.

HEALTHDEP – SECURE HEALTHCARE DATA DEDUPLICATION APPLICATION

HTML | CSS | JavaScript | SQL | JSP

- Developed a full-stack healthcare application designed to reduce data redundancy by over 60%.
- Worked on the web interface and presentation components of the application.
- Organized digital content and interface elements for clear and consistent presentation.
- Reviewed project components for accuracy and consistency during development.
- Applied revisions based on project requirements and development feedback.

PERSONAL PORTFOLIO WEBSITE

HTML | CSS | JavaScript

- Designed and developed a personal portfolio website showcasing education, experience, technical skills, and projects.
- Created structured page layouts with attention to visual consistency and content organization.
- Reviewed webpage elements for alignment, formatting, presentation, and content accuracy.
- Revised digital content and layouts to improve clarity and overall presentation.

CERTIFICATIONS

- Smart Coder – Smart Interviews
- Front-End Development Workshop – AIRBACLABS
- Java Full Stack Web Development Internship – BrainOvision

ADDITIONAL INFORMATION

- Strong attention to detail and accuracy
- Comfortable asking questions and clarifying ambiguous requirements
- Receptive to feedback and committed to continuous improvement
- Comfortable working independently in a remote environment
- Strong willingness to learn production artwork and apparel print-production workflows
- Hobbies: Drawing, Cricket
